EMERGENCY REPAIR WORK-Hull Dock

Wednesday, Aug 6th – Sunday, Aug 10th

To prevent the ferry loading docks/floats from bottoming-out during low-tide construction will begin to move the docks seaward. This work will prevent unnecessary damage to the docks, ensure safe landings and eliminate costly dredging.

While service in and out of Hull can continue during much of the work there will be a period of *5 days, between Wednesday, August 6th, and Sunday, August 10th when NO service will be possible.*

During this time the ferries that normally service Hull will continue to operate between Hingham and Boston Long Warf including Logan Airport as scheduled.

We apologize for this temporary inconvenience while this necessary relocation project is completed.
